DOUBLE-ACTING FINE CONTROL VALVES IN LINE

It is the solution for application requiring special adjustment of small flow rates. For both hydraulic-pneumatic applications with flow rate up to max. 3 l/min. They can be used also with fluids different from oil, such as: gas and liquids in general.

This version has the same characteristics as the series FT 1250 and it maintains its main characteristics:

- metallic sealing;
- provision for panel mounting;
- security against accidental needle withdrawal.

On request • NPT threads

- Viton (V) seals
- Version in AISI 316 FT 2237\2
