

Technical Data Sheet

Food-Tek Synfood EP 00

A food grade, synthetic, water resistant, high performance, fluid grease for food, beverage, pharmaceutical and other clean industries

Synfood EP 00 is a premium quality, non toxic, fluid grease containing EP additives, anti-corrosion additives and special anti-wear additives to increase wear resistance and load carrying properties.

Synfood EP 00 is ideal for central lubricating systems.

Synfood EP 00 is also a very good choice as a high viscosity gearbox lubricant.

Applications: -

All plain and anti-friction bearings, bushes, slides and guides. High and low temperature applications. Excellent for wet and wash down areas, all heavy duty grease applications within the food and clean industries. Specifically suited to centrally lubricated machinery & can also be used as a gearbox lubricant

Features and Benefits: -

- | | |
|-------------------------------|--|
| ➤ NSF H1 registered | Safe to use where incidental food contact may occur. |
| ➤ Fully Synthetic | long life, extended lubrication intervals |
| ➤ Resists wear | extends component life |
| ➤ Excellent EP properties | Resistant to shock loads, increased load carrying |
| ➤ Very High water resistance | extends component life and lubrication intervals |
| ➤ Very good temperature range | Continuous temperature range -50°C to +130°C |
