

# Technical Data Sheet

## Marine 30 TBN12

Product Code: MAR002 - Revision: 20181203

### Product Description

A premium diesel engine oil, designed with an alkaline reserve for high/ medium speed trunk piston engines, burning fuel with a maximum sulphur content of 1.0%. Blended with a balance of detergents and dispersants to provide increased resistance to cylinder liner lacquer and sludge formation in severe applications. Superior load carrying properties minimise piston ring and liner wear.

### Benefits

- Excellent rust and corrosion properties.
- High quality detergency and dispersancy system.
- Thermal and oxidation stability.
- Anti-foam and delmulsifying properties.

### Applications

Suitable for high/ medium speed marine diesel engines, it is also suitable for some gearing applications.

### Typical Test Data

Density @15°C	-	0.88
Flash Point (°C)	-	>190
Kinematic Viscosity cSt @ 100°C	-	10.7
Kinematic Viscosity cSt @ 40°C	-	92
Pour Point (°C)	-	<-25
Total Base Number (mg KOH/g)	-	12.0
Viscosity Index	-	99

### Product Profile
