

Technical Data Sheet

Marine 50 TBN70

Product Code: MAR009 - Revision: 20181203

Product Description

An excellent cylinder lubricant for use in two stroke cross head diesel engines. Produced from the finest base oil and additive system, it has superior reserve alkalinity and anti-wear properties. Designed for use in areas with higher levels of sulphur in fuel of up to 3.5%.

Benefits

- Excellent thermal and oxidation stability.
- Exceptional anti-wear properties.
- Outstanding detergency capability.
- Control of piston deposits.

Applications

Ideal for two stroke cross-head engines.

Typical Test Data

Density @15°C	-	0.93
Flash Point (°C)	-	>200
Kinematic Viscosity cSt @ 100°C	-	20
Kinematic Viscosity cSt @ 40°C	-	221
Pour Point (°C)	-	<-10
Total Base Number (mg KOH/g)	-	70
Viscosity Index	-	99
