

Technical Data Sheet

Marine 40 TBN07

Product Code: MAR010 - Revision: 20181206

Product Description

A premium quality performance system oil. Formulated from a blend of high quality paraffinic base oils and a carefully formulated additive system, providing excellent detergency and dispersancy characteristics with strong anti-wear behaviour. Designed for the lubrication of bearings, running parts and crosshead assemblies.

Benefits

- Excellent rust and corrosion properties.
- High quality detergency and dispersancy system.
- Thermal and oxidation stability.
- Anti-foam and delmulsifying properties,
- Reduced deposits in piston cooling spaces and crankcase.

Applications

Recommended primarily for use as system oil in late model, low speed 2 stroke crosshead diesel engines employing the system oil for piston cooling. Also suitable in older design crosshead diesel engines which have water-cooled pistons and certain hydraulic systems.

Typical Test Data

Density @15°C	-	0.89
Flash Point (°C)	-	>190
Kinematic Viscosity cSt @ 100°C	-	14.5
Kinematic Viscosity cSt @ 40°C	-	142
Pour Point (°C)	-	<-20
Total Base Number (mg KOH/g)	-	7.0
Viscosity Index	-	100
