

Kuny's (KUNKP295)

KP-295 Hard Shell Knee Pads

The Kuny's Swivel cap kneepads allow for easier movement and pivoting on site, and are ideal for installation of carpet and vinyl flooring. Can be used inside or outside, the hard plastic cap provides additional protection on rough or sharp surfaces. An exclusive stitching groove (patented worldwide), prevents the stitching making contact with the floor surface protecting it from abrasion. A super tough fabric covering extends down the knee for additional comfort and protects the comfortable foam padding. Fastened by two elasticated straps with hook and loop closure to fit most leg diameters.
