

Roughneck Clothing (RNKSGCLEAR)

Safety Glasses Clear

The Roughneck General Purpose Clear Safety Glasses have been designed for protection against low energy, high speed impacts of up to 45m/s (100mph). These durable glasses are manufactured from a one piece wide angle lens to provide maximum peripheral vision and wraparound arms for added side protection. The lens is scratch and impact resistant with an anti-fog coating and are UV resistant. These user friendly glasses feature a removable soft rubberised gasket, helping to provide a soft comfortable seal between the face and the frame of the glasses for added protection against dust ingress. Conform to EN166:1F and EN170.
