

Technical Data Sheet

Bondloc B7782 Gasket Remover

PRODUCT DESCRIPTION

B7782 gasket remover is a powerful blend of non-chlorinated/Dichloromethane free solvents, designed to remove most types of paints, surface coatings and worn gaskets. The viscous gel formula clings to vertical surfaces, helping to prevent run-off. It is particularly suitable for aluminium or other soft metal flanges where scraping could lead to surface damage.

APPLICATIONS

- Removing worn gaskets from rocker box covers, water pumps, manifold and general metal engine components.
- Removing paints varnishes and lacquers prior to refinishing, including 2-Pack, Acrylic, Cellulose, Vinyl, Alkyd and Polyurethane.
- Removing charred oil residues & other carbon deposits from engine components.
- Removing rubber residues from wheel hubs prior to fitting new or repaired tyres.
- Don't not use on plastics or rubber components.

INSTRUCTIONS FOR USE

Shake thoroughly before use. Spray liberally onto the surface or component from a distance of 15 to 20cm, ensuring a good coating. Leave for up to 15 minutes to soften or dissolve the paint or gasket. Remove with a scraper or similar implement. Repeat application as necessary. Do not allow the product to dry out before removal.

TECHNICAL FEATURES

Appearance	Off white viscous gel
Flammability	Extremely flammable, flash point below -20°C
Non-Volatiles % m/m	<5
Composition Data	A thickened solution of a 1,3-Dioxolane, Acetone and Odourless Kerosene dispersed in Dimethyl Ether propellant.
Specific Gravity	0.93 – 0.97
Viscosity	1000 – 2000 cPs at 20°C
Storage	8 °C to 22 °C in dry location and out of direct sunlight.
Shelf Life	18 months

HEALTH & SAFETY

This technical information sheet does not constitute a Safety Data Sheet (SDS). Before using this product ensure you have read and fully understood this products SDS.

PACKAGING FORMAT

500ml aerosols.
6 cans per box
